

COURSEBUILDER

NEXT GENERATION CONTENT AUTHORIZING

FOR LEARNING TEAMS

MULTI-LANGUAGE

CLOUD-BASED

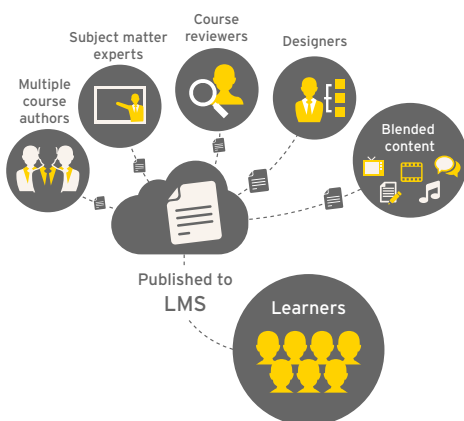

MULTI-DEVICE

CourseBuilder is the cloud-based tool of choice for creating multi-language and multi-device digital learning. Teams can collaboratively create, edit and publish one course that will play on any device, on any platform, in many languages and on any learning management system.

KEY FEATURES

- Enterprise scale collaboration
- Create once, publish to any device
- Powerful multi-language support
- Full control of branding and look-and-feel

COLLABORATIVE CONTENT CREATION

GLOBAL TEAM-FRIENDLY WORKFLOW

CourseBuilder is cloud-based, so teams can work on the same course simultaneously, from anywhere. No need for local installation or software version nightmares! Files, graphics, interactions and even complete elearning modules can easily be shared, copied and repurposed, reducing development time. Automatic tracking of feedback streamlines your processes. You can quickly see who's reviewed a course, the changes required and whether the amends have been done. And with everyone working on one course at the same time, version control is not an issue.

CourseBuilder allows you to specify roles and permissions not only for a whole course, but also for specific modules and language versions. For example, you can give someone author permissions for one module, so they can create and modify content. However, for another module you might give the same person only reviewer permissions, with limited access to content and no editing rights.

CREATE ONCE, PUBLISH TO ANY DEVICE

CourseBuilder allows you to publish content to work on both desktop and mobile devices. One course works on multiple devices with no need to create separate versions, saving you development time and allowing you to react to business needs quickly and efficiently. Learners can access courses across different devices without losing their progress, picking up wherever they left off. Flexible learning at its best.

SEAMLESS TRANSLATION AND LOCALISATION

CourseBuilder's 'One Course' concept means you create and publish multiple language versions and localised content easily as a single package.

FULL CONTROL OF BRANDING AND LOOK-AND-FEEL

Fully customise all aspects of the look-and-feel of your content for your own organisation with our powerful Skin Editor. Create Skin templates for your team to use, ensuring easy brand control.

INTUITIVE AND EASY TO USE

With its intuitive drag-and-drop visual editing, CourseBuilder has been designed for you to create rich, engaging digital learning content with minimal product training and no programming experience.

BEYOND THE COURSE

CourseBuilder's unique power and flexibility busts the boundaries of 'traditional' elearning and lets you create beyond-the-course content:

- Explainers, micro-learning, nano-learning, etc. can all be authored within CourseBuilder
- Supports gamification of learning
- Adaptive learning - role-based, level-based, results-based, learner-directed
