AT A GLANCE

- One contact, one contract
- Rapid deployment
- Data-driven demand management and planning

ONE CONTACT, ONE CONTRACT

Our OTS service gives customers the ability to purchase elearning material from multiple content providers under one Lumesse contract. No need to manage multiple contracts and suppliers, just brief us on your training needs and we'll source the best elearning content from the industry to play on any learning management system.

We will map competencies, IT requirements and language needs, saving you time and money. We also guarantee the same price as our partners offer direct. But due to the volume of content we procure, we are often actually cheaper than going direct.

Lumesse undertakes highly rigorous due diligence on all partners to ensure that when a partner is selected, they will still be around in two to five years' time, and that all their content works on our clients' LMS and IT infrastructure. The service also includes regular reviews with our OTS Partner network, where we ensure we are up-to-date with their organisational changes and any associated updates to their content.

RAPID DEPLOYMENT

Where an LMS is also required, content can be preloaded into Lumesse Learning Gateway, or into your own LMS, and is available to distribute to your organisation quickly.

The OTS team at Lumesse update the central Learning Gateway repository on an ad-hoc basis to ensure that content is always up-to-date. For those customers not using Learning Gateway, we provide SCORM files for upload to their LMS.

DATA-DRIVEN DEMAND MANAGEMENT AND PLANNING

As part of the Lumesse service, we provide customers with quarterly analytics on usage, how many users have accessed the content, and how likely the company is to finish the contract against the purchased agreements.

Custom analysis can also be provided on request.

Our OTS service gives access to a massive library of learning resources from the world's leading providers of learning content in key subject areas:
